INSTALLING THE ACTION

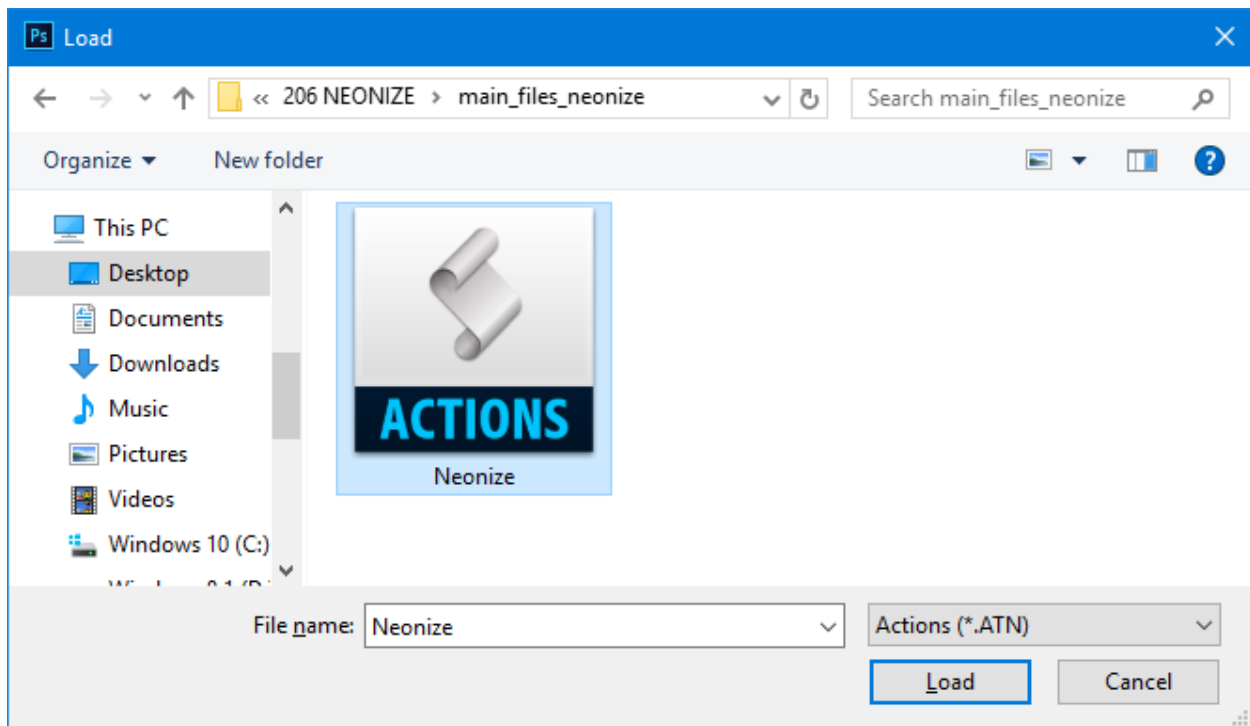

1. Bring up the **Actions** panel by clicking **Window > Actions** or by pressing **Alt/Opt+F9**.

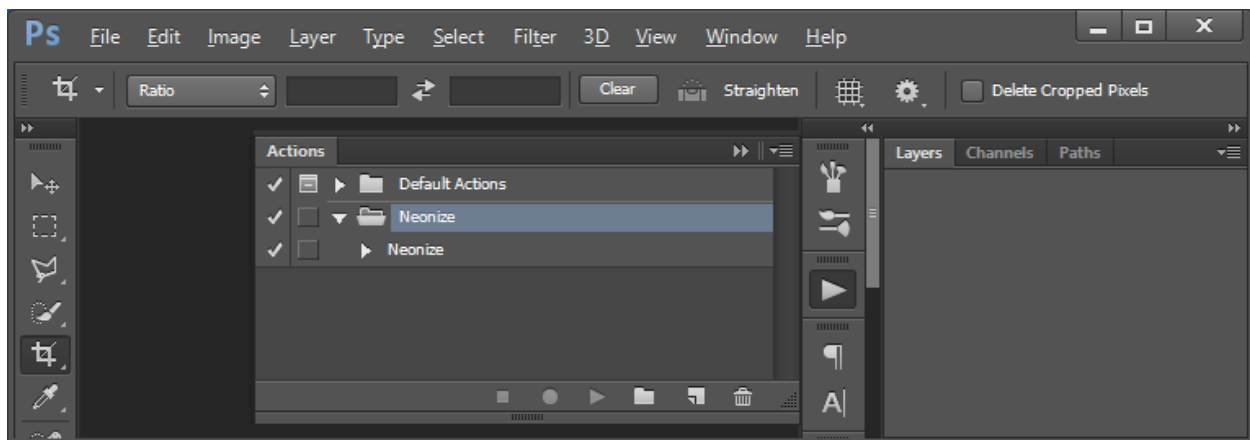

2. The **arrow/play** icon will appear, clicking which will open the **Actions** panel.

3. Click the **dropdown** button and select **Load Actions**.

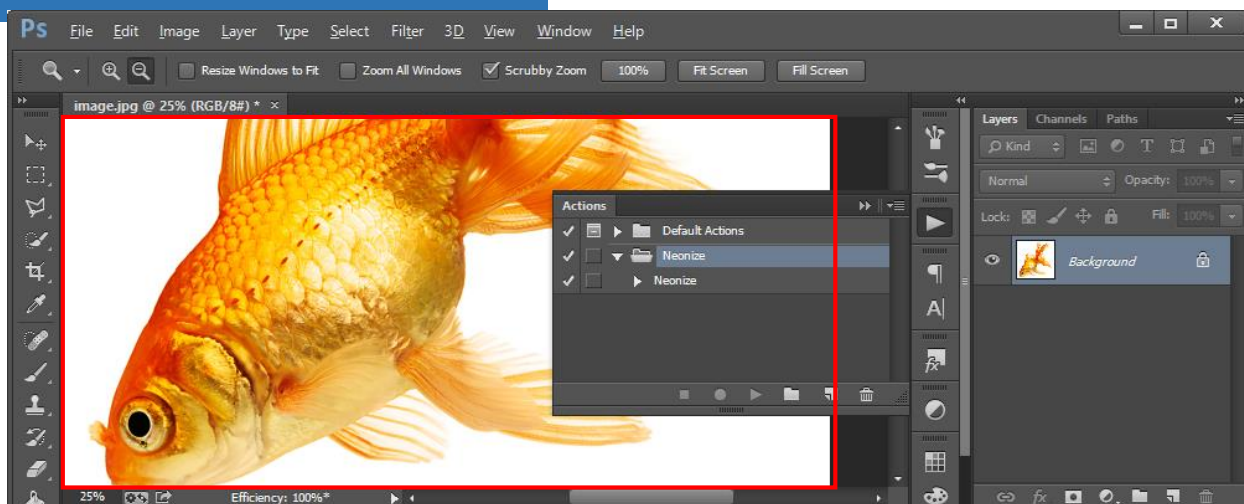

4. Browse and select the **Neonize** action and click **Load**.

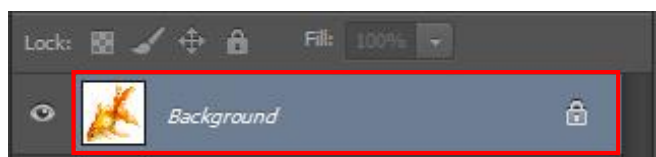

5. The **Neonize** action will appear in your actions list.

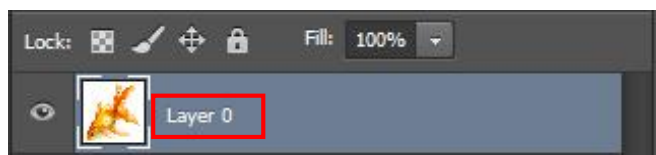

PREPARING THE CANVAS

1. Open the image to add the effect (Make sure **RGB color mode** is selected).

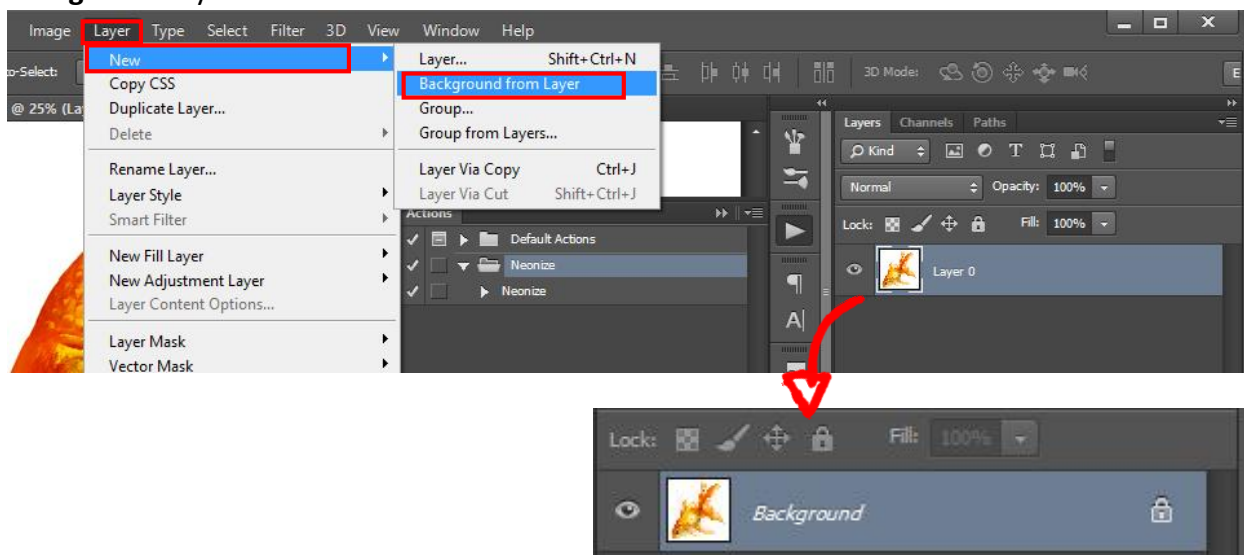

***Important:** 2. Make sure that your image layer is set as **Background** layer with the lock icon.

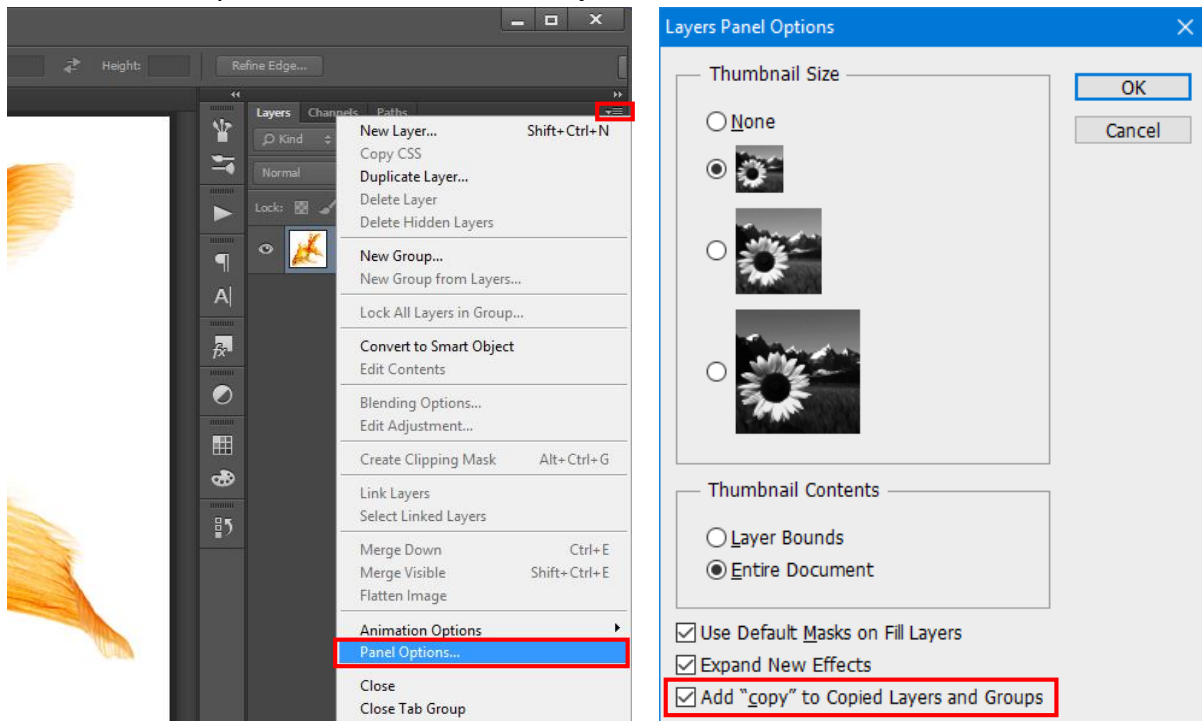

In case it is not (as shown on the left), follow below steps to set it as **background**.

While the layer is selected, select **Layer > New > Background from Layer** to convert it to a **background** layer.

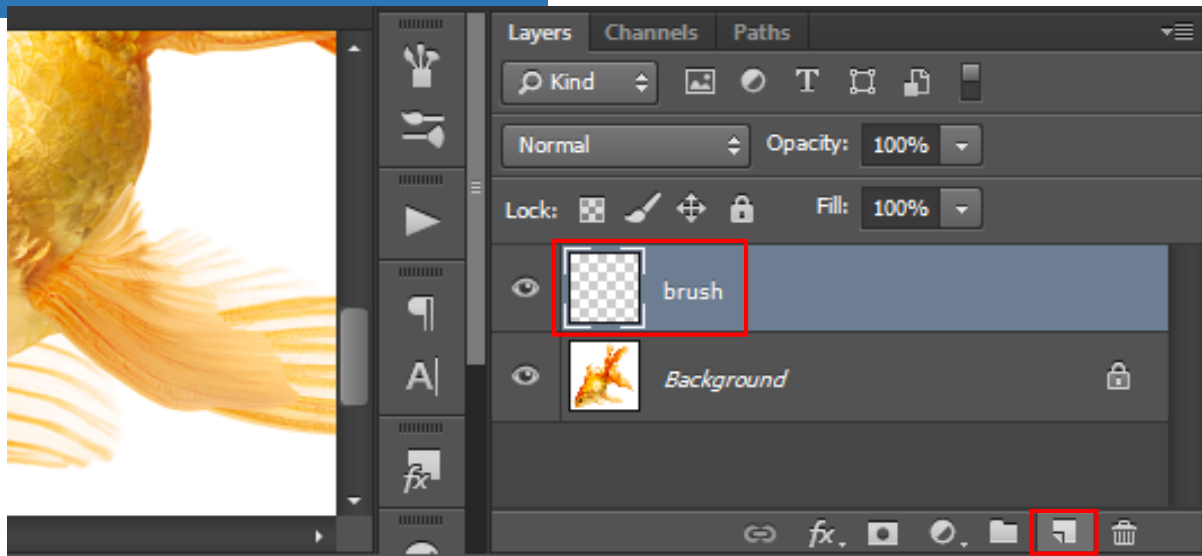

3. Click on the fly-out list and select **Panel Options**.

Make sure **Add "copy" to Copied Layers and Groups** is checked.

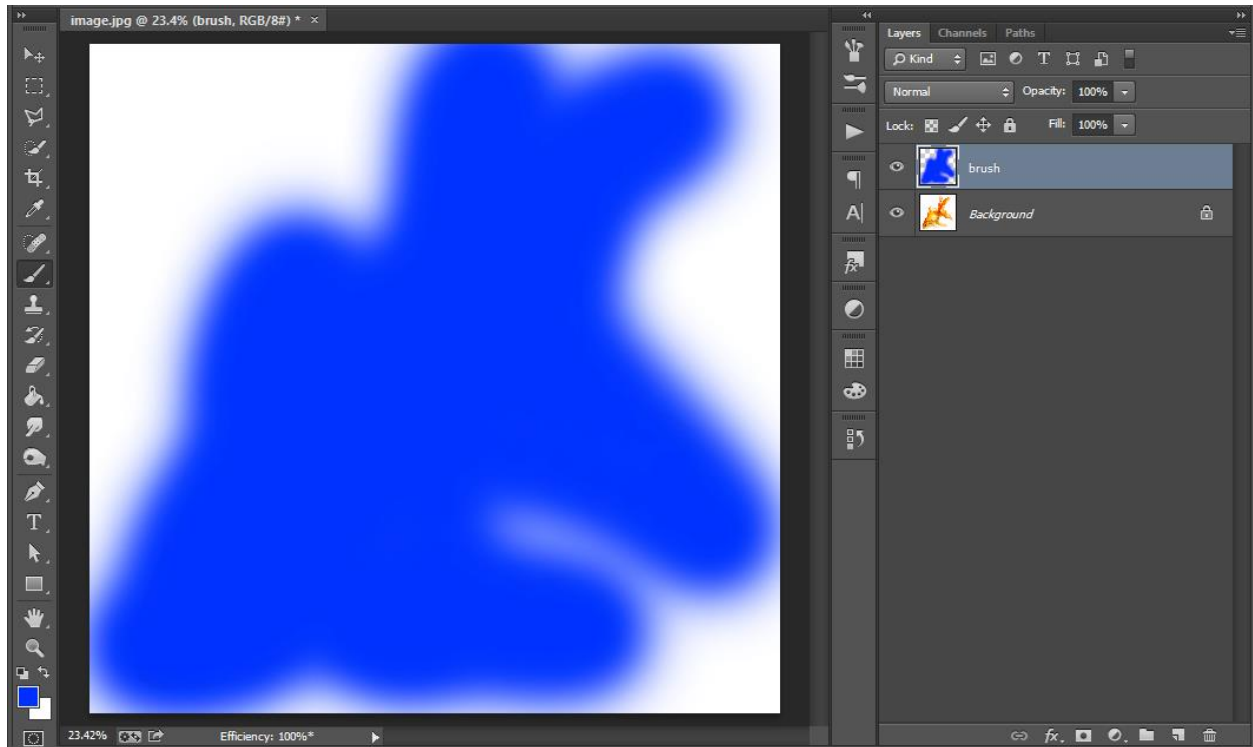

BRUSH OVER THE AREA

1. Click on the **New Layer** icon and rename the new layer as **"brush"**.

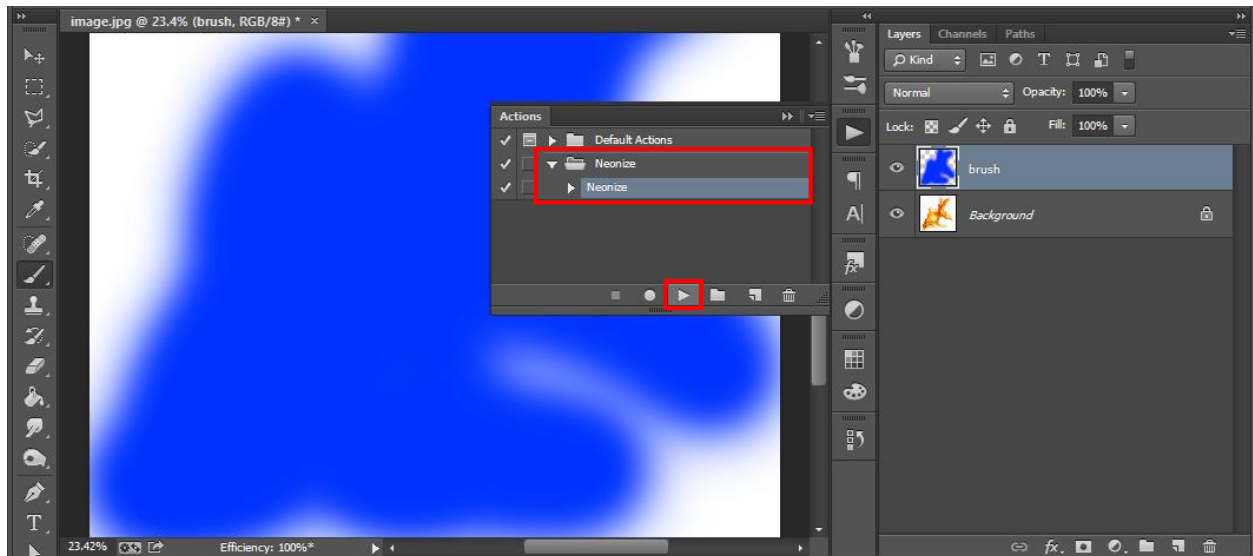

***Important:** The layer must be renamed as **"brush"**, all in lowercase.

2. Take any brush (preferably **soft-round brush**) and any color, and brush over the area of the image where you want to apply the effect.

PLAY THE ACTION

Now is the time to play the action.

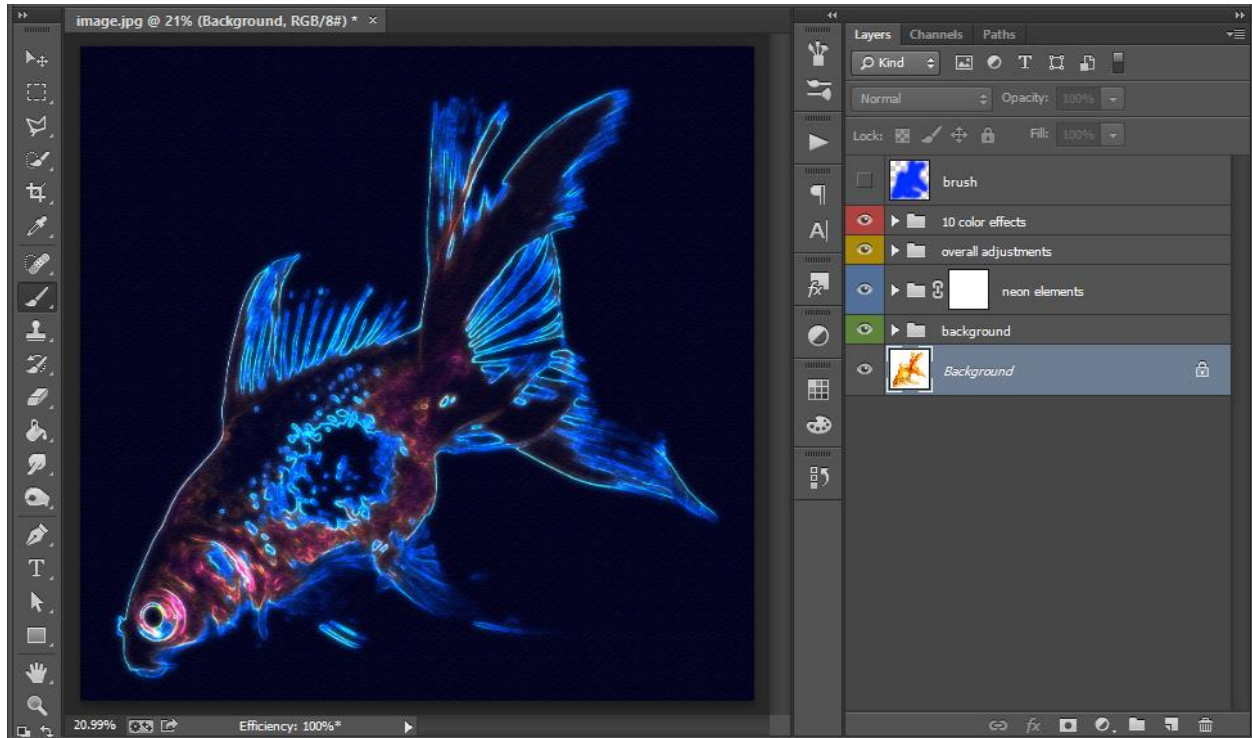

1. Expand the **Neonize action set** and select **Neonize action**.

***Note:** The action works best with images having size 2000-4000 px. Using lower sized images result in reduced detail and quality of the final composition.

***Tip:** Smaller sized image maybe increased to the recommended size. The degraded quality in increasing image size does not affect much in the final composition.

2. Click the **Play** button and wait for some time for the action to finish.

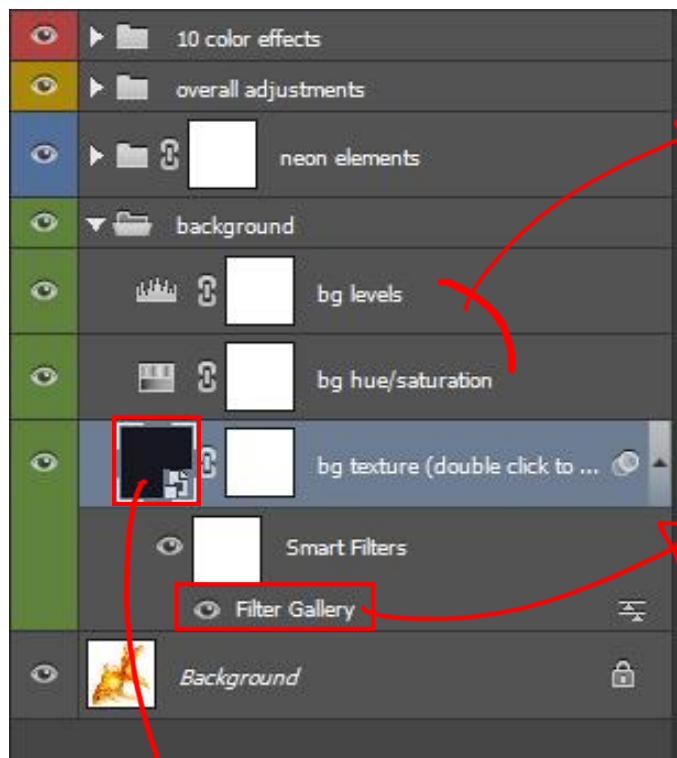

The finished and applied **Neonize** effect.

TWEAKING THE EFFECTS

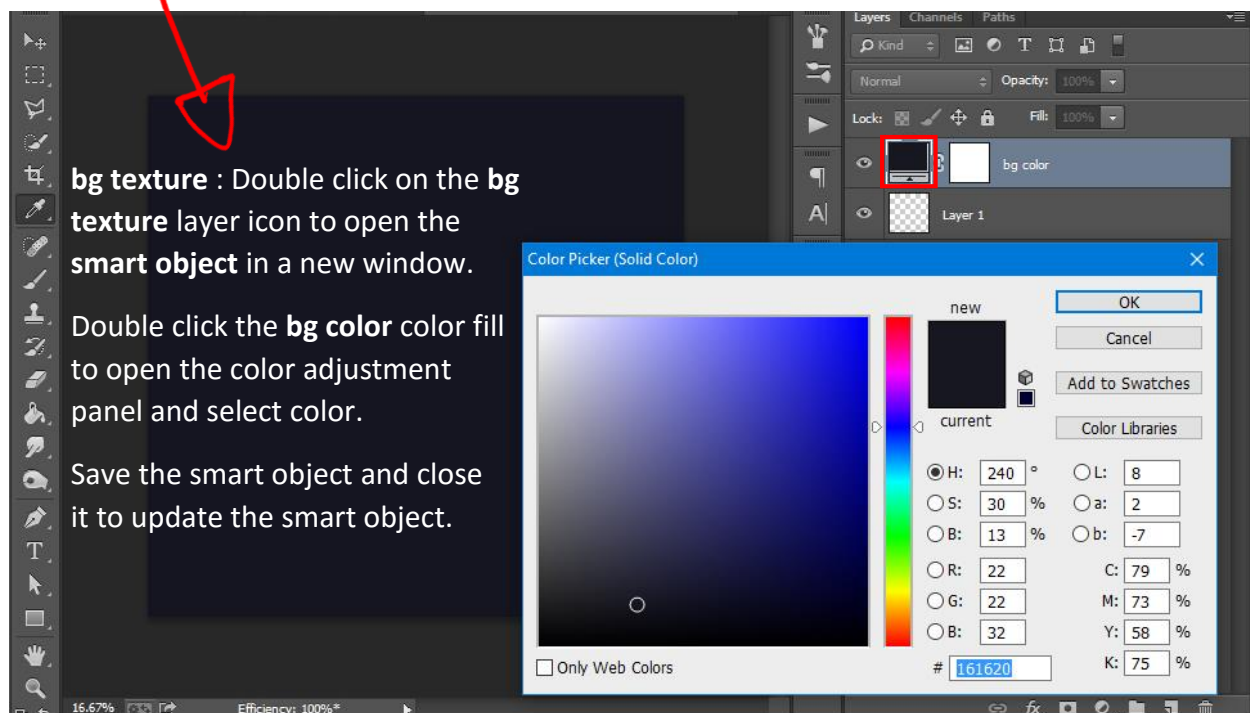

Below is a quick guide about the layers and groups.

• BACKGROUND •

bg levels and hue/saturation : Double click the adjustment layers to open the adjustment panels and edit.

Double click on the **Filter Gallery** smart filter to edit the grained background texture.

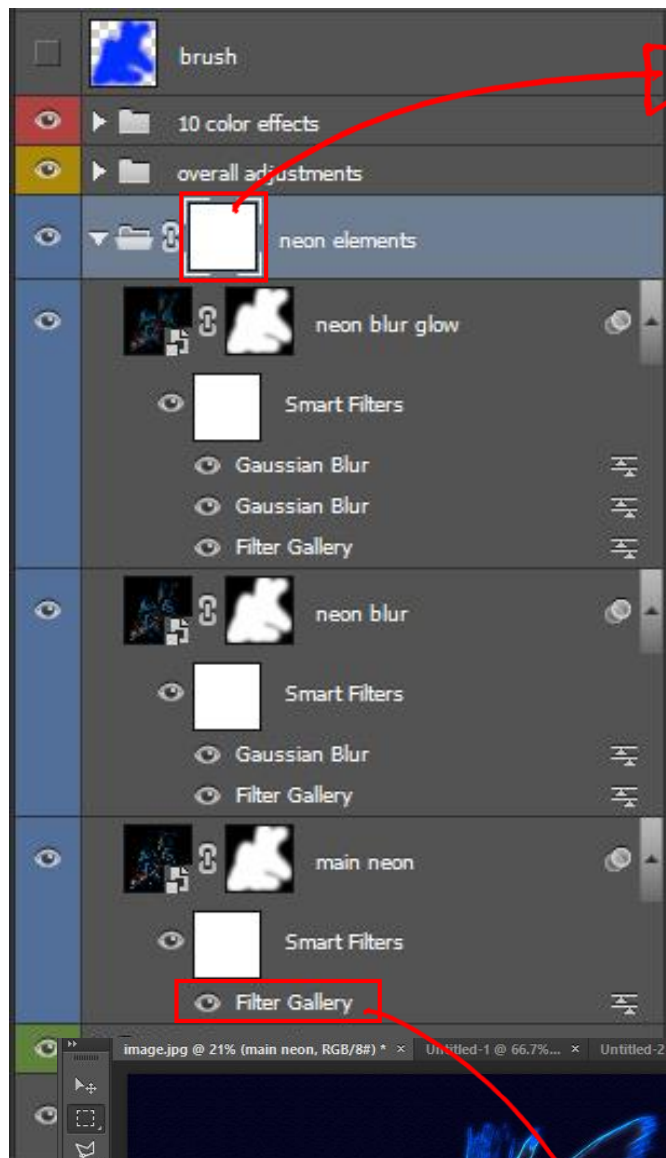

bg texture : Double click on the **bg texture** layer icon to open the **smart object** in a new window.

Double click the **bg color** color fill to open the color adjustment panel and select color.

Save the smart object and close it to update the smart object.

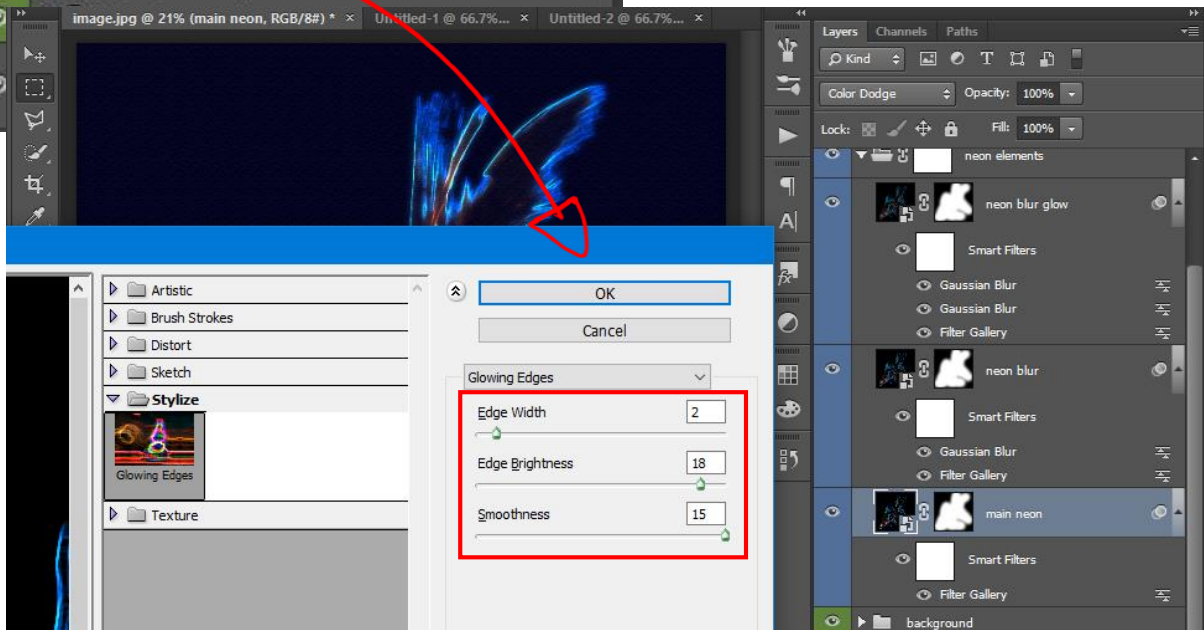

• NEON ELEMENTS •

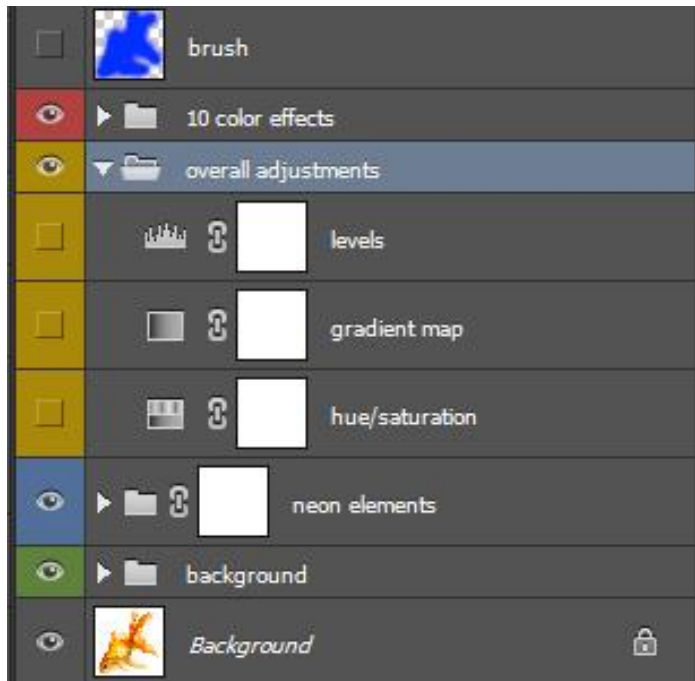

neon elements : Take a **soft-round brush** and select **color black** and paint on the **neon elements mask** to hide area that you want to hide.

Adjust the opacity of the other elements.

Double click on the **Filter Gallery** to open the filter edit window. Adjust the **Edge Width**, **Edge Brightness** and **Smoothness** to adjust the **Glowing Edges**.

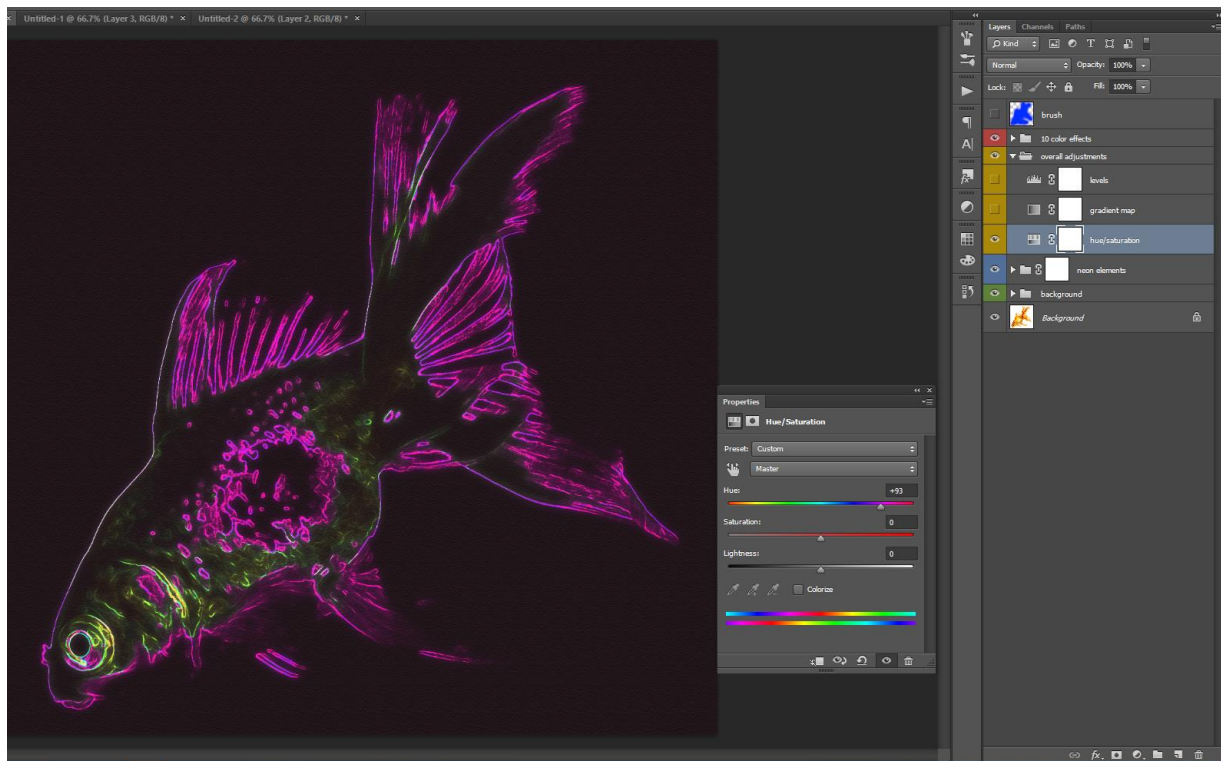

• OVERALL ADJUSTMENTS •

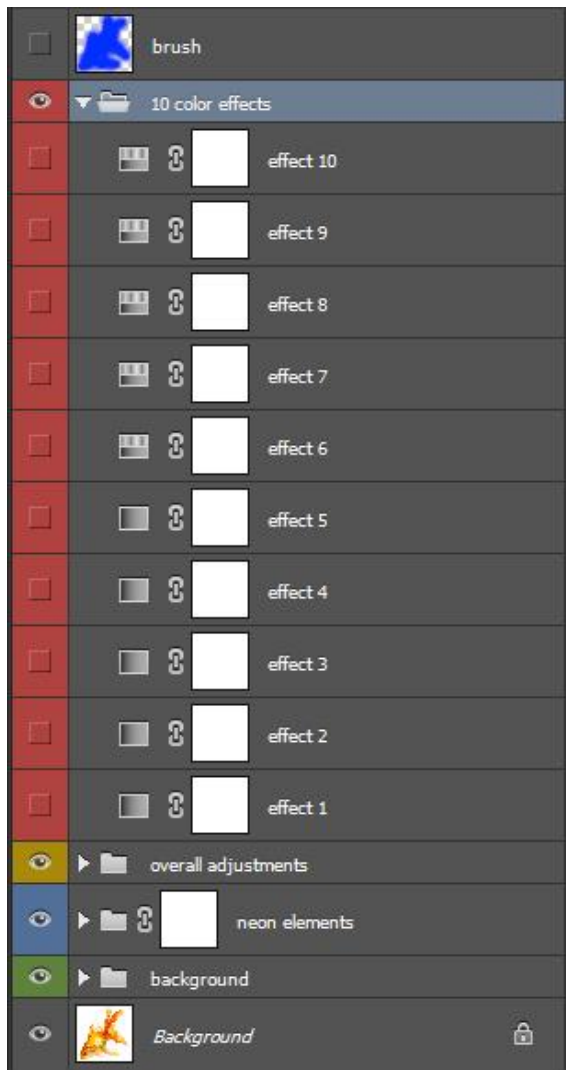

overall adjustments : Double click on the **levels**, **gradient map** and **hue/saturation** to bring up the adjustment panels.

Adjust to effect the overall composition.

• 10 COLOR EFFECTS •

10 color effects : Toggle the **eyeball** icon next to the styles to show/hide the color effects.

Below is the preview of the 10 color effects.

***Note:** Try mixing different effects together to create additional effects. Also play with the opacity of the effects layers, or try changing the gradients and hue/saturation yourself!

• MIX DIFFERENT STYLES TO CREATE STUNNING EFFECTS •

***Tip:** Take a **soft-round brush** and paint with **black/white** on the layer masks of the various effects to create stunning effects.

Below is an example of mixing 3 effects with the default layout. Try experimenting on your own to create unique compositions.

Happy Neonizing!
THANK YOU
